

Key Stage One Summer Term Report

A few very lucky children have been attending Key Stage Gardening Club this term with Miss Williams. They have had fun planting their own herb garden and even got to take home their own sunflowers to grow.

We had a visit earlier in the term from the All Stars Cricket Club where we learnt the rules of cricket and how to throw and catch a cricket ball. We then put our new skills into practice and played a game.

Year One and Two have been taking part in some very interesting P4C discussions. We have been learning different ways of voting and thinking about how to generate questions. Our debates were linked to friends, thinking about what it means to be a good friend and how we should treat our friends.

We have been very busy in Year One and Two practicing our Maths Dictionary. We are getting very confident now and can even say lots of it without looking at the board. We also have some very good actions to help us remember what comes next. It's really helping us learn our tricky maths facts.

Year One

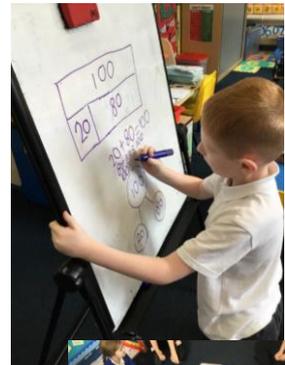

In Year One we've been trying hard to make sure we follow our Mersey Park value of 'Be Nice' and we've been thinking about this particularly at playtimes and lunchtimes. We've been trying to do random acts of kindness to our friends and children in other classes.

In Year One we had an exciting start to our Seaside topic. We spent the day looking at seaside objects from the past, doing seaside phonics, going on a beach treasure hunt and designing and making a delicious ice-cream.

During Fitness Friday we were cheeky enough to sneak on to the Upper playground for a go on the new playground equipment. It was great fun!

In Year One we are still loving Power Maths and have been using our new giant ten frame to help us work out tricky number bonds to 100 in 10s.

We have been very busy completing our giant Friedensreich Hundertwasser art work as part of our new Buildings topic. We looked at some of his vibrant art work and created our own huge version as a class.

Year Two

Our Year Two topic of 'Time Detectives' started with the exciting appearance of a Mystery Box. When we opened the box we found lots of interesting articles related to the history of our school. As well as this we took a tour around our school building and found lots of artefacts which told us how old the school is. We couldn't believe our school is 117 years old! We loved watching the old videos of our school in the memories section on the school website.

In Year Two we have been enjoying 'Funtrition' lessons each week with Mr Primrose. We have learnt all about what we should do to keep our bodies fit and healthy including; how much exercise we should get each day, how important it is to get a good night sleep, what foods we should eat and the importance of relaxation.

We have enjoyed using the iPads to complete branching databases for our ICT lessons this half term. We decided to make them all about flowers and trees linked with our Plants topic in Science.

In Year Two we enjoyed an exciting Exit Point to our Katie Morag topic. We came in dressed as our favourite Katie Morag character and completed some fun activities. We learnt a Katie Morag dance, made a 3D Struay model and made delicious shortbread.
