

Week beginning 29th June 2020

Hello again Year 2! A new week, a new set of challenges. As always we have been checking your books on Bug Club and adding new 2Do's to Purple Mash - we love marking them so keep doing them and try some of the Twitter challenges too. If you want something different have a look at these and see how many you can complete with your family:

Rainfall Gauge

As the weather is supposed to be rainy most days this week can you complete a Maths challenge to do with the rain?

Choose a container and leave it outside for the same length of time each day (perhaps from 9am until 3pm like the school day).

Then take it inside to discover how much rain has been collected. Can you make a bar graph of the rainfall? Which day rained the most?

Year 2 Learning Journal

We know our year has been cut short but we have learnt lots this year. Think about our Transport, Fire Fire and Island Adventures topics as well as the different stories and Science work we have covered.

I Completed My Training!

Reflect on all the amazing things you have learned this year.

When I first started my learning journey this year, I already knew so much.

As we explored new subjects and topics, I discovered even more knowledge and skills!

I learned how to...

Write about three different things you have learned and why you chose them.

Move like an animal

Can you find different ways to move around your house or garden that mimic how an animal would move? Here are some examples:

The spider *tickled* his way across my carpet.

The cat *padded* her way across the garden fence.

The little mouse *scampered* across his cage.

The snake *slithered* across the grassy floor.

Enjoy exploring the place like animals!

Normally at this point in the year we would visit Mersey Park to complete a few activities. One would be to produce some artwork inspired by Andy Goldsworthy and nature.

Can you collect together natural items and create a picture with them? It could be a spiral, a flower, a sun or an animal.

Share photos of the activity with us by emailing: schooloffice@merseypark.mirralsch.uk.

Art or Not Art?

Look at the image and discuss with someone is this art? How do you know? If I told you an elephant was painting this would it change your mind? Who is the true artist the elephant or it's trainer?

This is a still image taken from this video if you'd like to see the rest of the clip:

Scavenger Hunt

Picture Books are a great way of encouraging your children to read for pleasure. They are open to more interpretation as children 'read' the pictures as well as the words.

See how many picture books you can read this week and keep a log of them to share when we see you in school.

In Science we would be looking at Plants and the jobs of the different parts.

Can you draw your favourite plant, label the different parts and explain what their job is?
